<p><b>Chinook Global Convertible Bond Fund (the “Fund”)</b>                  Class F USD Shares (Accumulating) ISIN: IE00BDDY2Z85                  The Fund is a sub-fund of Ferox Investments ICAV (the “ICAV”)</p>								
<p><b>Objectives and Investment Policy</b></p> <p>The Fund seeks to grow and preserve capital through management of a portfolio of primarily Convertibles. The Fund is actively managed and targets returns as good as or better than those generally available in the Convertibles market.</p> <p>The Fund seeks to achieve its objective primarily by investing in Convertibles (including ASCOTs) of issuers located anywhere in the world, including emerging markets.</p> <p>The Fund may also invest in other Debt Securities, Equities, ERS or other investment funds (up to 10% of net assets). Equities are generally only held where the Fund already holds a related Convertible or are the result of conversion of a Convertible.</p> <p>The Fund may utilise FDI for hedging (a technique intended to protect the Fund’s unrealised gains by hedging against possible adverse fluctuations in the securities markets or changes in interest rates or currency exchange rates that may reduce the market value of the Fund’s investment portfolio), efficient portfolio management, or for investment purposes. The Fund may take long positions (benefitting from an increase in value) or short positions (benefitting from a fall in value) through FDI.</p> <p>The instruments in which the Fund invests are selected using systematic analysis of the characteristics of the investment (size, liquidity, credit quality, etc.) as well as attractive quantitative measures in considering the investment’s ability to assist the Fund in achieving its objective.</p> <p>Any income less expenses realised will be accumulated and reinvested into the net assets of the Fund.</p> <p>Investors can buy or sell shares on any day on which banks in Dublin and London are open.</p> <p>As a guide to the return generally available in the Convertibles market the Fund references the Refinitiv Global Focus Hedged CB Index (the “Index”). This is for comparative purposes only and the deviation in portfolio holdings between the Fund and the Index may be significant.</p> <p>For full investment objective and policy details, please refer to the “Investment Objective” and “Investment Policies” sections of the Fund’s supplement.</p>	<p><b>Definitions</b></p> <p><b>ASCOT:</b> An FDI with a Convertible as the underlying asset, in which the Fund has the right (but is not obliged) to purchase the Convertible or the fixed income or equity portion of it separately at a pre-determined price and time.</p> <p><b>Convertibles:</b> Fixed income and preferred stocks that can be exchanged for a specific amount of common stock, or the same effect achieved by a combination of two separate securities. Such securities may be of fixed or floating interest rate and Investment Grade or below Investment Grade or unrated credit quality.</p> <p><b>Debt Securities:</b> Various types of bonds, debentures and promissory notes of corporate, government, sovereign and quasi sovereign issuers. Such securities may be of fixed or floating interest rate and Investment Grade or below Investment Grade or unrated credit quality.</p> <p><b>ERS:</b> Equity related securities which include instruments that provide exposure to a company in another jurisdiction through securities markets outside of that jurisdiction and FDI that provide the right but not the obligation to buy or sell an Equity at a specified price on or before a specific date.</p> <p><b>Equity(ies):</b> Listed and unlisted (up to 10% of net assets) securities that represent an ownership stake in a company.</p> <p><b>FDI:</b> A derivative contract between two or more parties whose value depends on the rise and fall of (an) underlying asset(s).</p> <p><b>Investment Grade:</b> Securities rated better than BB+ by Standard &amp; Poor’s or an equivalent rating by any other principal rating agency.</p>							
<p><b>Risk and Reward Profile</b></p> <p><b>Lower Risk</b> <span style="float: right;"><b>Higher Risk</b></span></p> <p>← Potentially Lower Reward <span style="float: right;">Potentially Higher Reward</span> →</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 12.5%;">1</td> <td style="width: 12.5%;">2</td> <td style="width: 12.5%;">3</td> <td style="width: 12.5%; background-color: #0070C0; color: white;">4</td> <td style="width: 12.5%;">5</td> <td style="width: 12.5%;">6</td> <td style="width: 12.5%;">7</td> </tr> </table> <p>The Fund is in category 4 as the assets it expects to hold have historically been subject to moderate to high levels of price fluctuation. This category is not guaranteed to remain unchanged and may change over time. It is based on simulated historical data and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean a risk free investment. The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.</p> <p>The Fund is exposed to additional risks not captured by the risk indicator including, without limitation.</p> <p><b>Convertibles Risk:</b> Convertibles expose the Fund to the risk the issuer of the fixed-income or preferred stock portion of the security may fail to meet its obligations as well as the performance of the underlying Equity into which it can be converted.</p> <p><b>Credit Rating Risk:</b> below Investment Grade and certain unrated securities are more sensitive to economic, regulatory and social developments and have greater Liquidity Risk.</p> <p><b>Debt Securities Risk:</b> changes in interest rates, and credit quality may have adverse consequences to the Fund.</p>	1	2	3	4	5	6	7	<p><b>Risk Factor</b></p> <p><b>Exchange Rate Risk:</b> Changes in exchange rates may reduce or increase the value of non-USD denominated assets held by the Fund. Currency hedging may not be successful in mitigating such effects.</p> <p><b>Class Currency Risk:</b> Currency hedging may not be successful in mitigating the effects of exchange rate fluctuations on non-USD classes.</p> <p><b>Emerging Markets Risk:</b> Emerging market securities are subject to greater social, political, regulatory, and currency risks than developed market securities.</p> <p><b>Credit/Counterparty Risk:</b> A party with whom the Fund contracts for securities or to safekeep the Fund’s assets may fail to meet its obligations (e.g. fail to pay principal or interest or to settle an FDI) or become bankrupt, which may expose the Fund to a financial loss.</p> <p><b>Liquidity Risk:</b> There may be insufficient buyers or sellers to allow the Fund to buy or sell certain types of securities readily.</p> <p><b>FDI and Leverage Risk:</b> In addition to Counterparty Risk, FDI may fluctuate in value rapidly and leverage embedded in FDI may cause losses greater than the original amount paid for the relevant FDI.</p> <p><b>Operational Risk:</b> Human error, system and/or process failures, inadequate procedures or controls may cause losses to the Fund.</p> <p>These risk factors are not exhaustive. Please review the “Investment Risks and Special Considerations” section in the Prospectus.</p>
