

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

<p>Salar Fund Plc (the “Fund”) (ISIN: IE00BBR6N758, Class E1 Sterling Shares (Distribution-Income)) The Fund is managed by CQS (UK) LLP</p>								
<p>Objectives and Investment Policy</p>								
<p>The Fund aims to generate positive returns and preserve capital principally by buying debt instruments that offer a yield but also the potential to convert to shares (convertible bonds). The Fund is actively managed and not managed with reference to a benchmark.</p> <p>The Fund aims to achieve a return that exceeds LIBOR.</p> <p>The Fund has a global focus. The Fund invests in bonds which are either Investment Grade or non-Investment Grade in developed and emerging market countries.</p> <p>The Fund invests primarily in convertible bonds that are trading close to their fixed income value. These convertible bonds are less sensitive to share price movement and are more bond-like in their risk profile, offering protection if shares prices fall. If share prices rise, they can still participate in this rise as they become increasingly equity-like.</p> <p>Some or all of the net income earned by the Fund will be distributed to investors in this share class semi-annually.</p> <p>The value of the Fund is calculated and published daily and investors can buy and/or sell shares on any day in which the banks are open for business in Dublin and London.</p>	<p>The Fund may, but is not obliged to, use Equities to reduce risk and manage the Fund more effectively.</p> <p>Derivatives may be used to achieve the investment objective and reduce risk or manage the Fund more effectively. This may include but is not limited to the use of derivatives to create a short Equity position to reduce Equity risk on long convertible bonds.</p> <p>For full investment objective and investment policy details, as well as subscription and redemption policies please refer to the prospectus.</p> <p>Equity(ies): listed and unlisted securities that represent an ownership stake in a company.</p> <p>Derivatives: instruments whose value depends on the rise and fall of other assets.</p> <p>Investment Grade: securities rated better than BB+ by Standard & Poor’s or an equivalent rating by any other principal rating agency.</p>							
<p>Risk and Reward Profile</p>								
<p>Lower Risk Higher Risk</p> <p>← Potentially Lower Reward Potentially Higher Reward →</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 12.5%;">1</td> <td style="width: 12.5%;">2</td> <td style="width: 12.5%;">3</td> <td style="width: 12.5%; background-color: #0070C0; color: white;">4</td> <td style="width: 12.5%;">5</td> <td style="width: 12.5%;">6</td> <td style="width: 12.5%;">7</td> </tr> </table>		1	2	3	4	5	6	7
1	2	3	4	5	6	7		
<p>The Fund is categorised as a 4 for the purposes of this table due to its investments in convertible bonds and use of Derivatives.</p> <p>This means that the Fund’s risk is normally higher than that of fixed income instruments but lower than that of equity instruments.</p> <p>The risk and reward indicator was calculated using historic data and may not be a reliable indication of the future profile of the Fund.</p> <p>The risk and reward category shown above is not guaranteed and may move up or down over time. The lowest category does not mean risk free.</p> <p>The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.</p> <p>Other Material Risks</p> <ul style="list-style-type: none"> Credit/Counterparty risk: a party or issuer that the Fund transacts with may fail to meet its obligations which could cause losses. Class Currency Risk: currency hedging may not be successful in mitigating the effects of exchange rate fluctuations on non-USD classes. 	<p>Definitions</p> <ul style="list-style-type: none"> Emerging markets risk: emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions. Operational risk: material losses to the Fund may arise as a result of human error, system and/or process failure, inadequate procedures or controls. Exchange rate risk: changes in exchange rates may reduce or increase the value of non-USD denominated assets held by the Fund. Currency hedging may not be successful in mitigating such effects. High-yield risk: high-yield investments, meaning instruments which pay a high amount of income generally involve greater credit risk and sensitivity to economic developments, giving rise to greater price movement than lower yielding instruments. Liquidity risk: convertible bonds are predominately traded on an over the counter market and may be subject to lower liquidity than the underlying equity securities. Derivatives and leverage risk: certain Derivatives may introduce in leverage into the Fund which may result in losses greater than the amount originally invested in that Derivative. <p>A more detailed description of the risk factors that apply to the Fund is set out in the Fund’s prospectus, which is available at www.cqs.com.</p>							

Charges																																		
<p>The charges you pay are used to pay the operating costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.</p>
