

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Salar Fund (the Fund) a sub-fund of CQS Funds (Ireland) plc (the Company). The Manager is KBA Consulting Management Limited (the Manager).

Class C1 Dist USD (ISIN: IE0006OWEZI2)

Class C1 Dist EUR (ISIN: IE000DYO6J66)

Class C1 Dist GBP (ISIN: IE000FJXQWQ6)

OBJECTIVES AND INVESTMENT POLICY

The Fund aims to generate positive returns and preserve capital principally by buying debt instruments that offer a yield but also the potential to convert to shares (convertible bonds). The Fund is actively managed and not managed with reference to a benchmark.

The Fund aims to achieve a return that exceeds SONIA.

The Fund has a global focus. The Fund invests in bonds, issued by corporate or governmental issuers, which are either Investment Grade or non-Investment Grade in developed and emerging market countries.

The Fund invests primarily in convertible bonds that are trading close to their fixed income value. These convertible bonds are less sensitive to share price movement and are more bond-like in their risk profile, offering protection if share prices fall. If share prices rise, they can still participate in this rise as they become increasingly equity-like.

Any income less expenses earned by the Fund will not be distributed to investors but will be accumulated in the net asset value per share of the Fund instead.

The value of the Fund is calculated and published daily and investors can buy and/or sell shares on any day in which the banks are open for business in Dublin and London.

The Fund may, but is not obliged to, use equities to reduce risk and manage the Fund more effectively.

Financed derivative instruments (FDIs) may be used to achieve the investment objective and reduce risk or manage the Fund more effectively. This may include but is not limited to the use of FDIs to create a short equity position to reduce equity risk on long convertible bonds.

For full investment objective and investment policy details, as well as subscription and redemption policies please refer to the Prospectus.

RISK AND REWARD PROFILE

Lower Risk			Higher Risk			
Typically lower rewards			Typically higher rewards			
1	2	3	4	5	6	7

The Fund is categorised as a 4 for the purposes of this table due to its investments in convertible bonds and use of FDIs. This means that the Fund's risk is normally higher than that of fixed income instruments but lower than that of equity instruments.

Like convertible bond and equity markets, the Fund may experience downward price movements from time to time. While the Fund seeks to reduce risk by investing in a diversified range of assets, such diversification does not eliminate risk.

The risk and reward indicator has been calculated using historic data and may not be a reliable indication of the future profile of the Fund.

The risk and reward category shown above is not guaranteed and may move up or down over time. The lowest category does not mean a risk free investment.

The Fund price may fall as well as rise and as a result you may not get back the original amount you invested.

Other Material Risks

- Credit/Counterparty risk:** A party or issuer that the Fund transacts with may fail to meet its obligations which could cause losses.

- Class Currency Risk:** Currency hedging may not be successful in mitigating the effects of exchange rate fluctuations on non-USD classes.
- Emerging markets risk:** Emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- Operational risk:** Material losses to the Fund may arise as a result of human error, system and/or process failure, inadequate procedures or controls.
- Exchange rate risk:** Changes in exchange rates may reduce or increase the value of non-USD denominated assets held by the Fund. Currency hedging may not be successful in mitigating such effects.
- High-yield risk:** High-yield investments, meaning instruments which pay a high amount of income generally involve greater credit risk and sensitivity to economic developments, giving rise to greater price movement than lower yielding instruments.
- Liquidity risk:** Convertible bonds are predominately traded on an over-the-counter market and may be subject to lower liquidity than the underlying equity securities.
- Derivatives and leverage risk:** Certain Derivatives may introduce in leverage into the Fund which may result in losses greater than the amount originally invested in that Derivative.

A more detailed description of the risk factors that apply to the Fund is set out in the [Fund's Prospectus](#) and Supplement.

CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is a maximum figure. In some cases, you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31 December 2022. It excludes portfolio transaction costs. This figure may vary from year to year. It excludes:

Performance fees, 10% of the outperformance of the Fund over a currency specific hurdle rate (see table) compounded daily.

For full details of the applicable charges for the Fund reference should be made to the fees and expenses section of the Prospectus and Supplement.

One-off charges taken before or after you invest

Entry Charge	None	Exit Charge	None
---------------------	------	--------------------	------

The Entry Charge is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charges	1.25%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	10% over a high-water mark/hurdle Hurdle: SONIA GBP for C1 GBP Shares, the Euro Short Term Rate for C1 EUR Shares and 90 day US LIBOR for C1 USD Shares
------------------------	--

The charges you pay are used to pay the operating costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

PAST PERFORMANCE

The past performance percentage reflected in the graphs above include all operating and management fees incurred by the Class C1 (Distributing) Shares of the Fund. Past performance is not necessarily a guide to future performance, prices may fluctuate and you may not get back your original investment. As this fund is a newly-established receiving entity of a merger of a previous UCITS fund, past performance reflects the performance of Salar Fund PLC
